# 1. VERSION CONTENT

## 1.1 SECURITY

## 1.2 IMPROVEMENTS

## 1.3 CORRECTIONS

A regression in the 6.0/13 version prevented the Commtouch antispam module from starting.

This problem has been fixed.

## 2. UPDATE INFORMATION

### 2.1 MAJOR VERSION

Fast360 system software release 6.0 is a major release, which will be maintained and supported over its lifetime with patches for security issues and product fixes only. In contrast to Fast360 scalable versions (5.1, 5.2, 6.1, 6.2, etc.), its functions will not change.

The advantages of a major release include faster updates and reduced management overhead since no new features or functionalities are delivered with 6.0/x security patches or general product fixes.

Before the update of Fast360 appliances, we recommend you to read the document KB730 available in the Knowledge Base available on our customer support site at <http://client.arkoon.net/>.

Important:

*It is recommended that the AMC server and Arkoon Tools versions are identical to the system version of managed appliances.*

### 2.2 SPECIFIC MIGRATION PROCEDURES

The migration or update procedure corresponding to your case can be generated on the Customer Area <http://client.arkoon.net/> thanks to the tool « Mise à jour et migration » (English version is not implemented yet). <http://client.arkoon.net/>.

From the version 5.1, only an AMC server can be the configuration master. It is no longer possible to configure appliances as configuration master.

In order to migrate from a 5.0 master/slave architecture to a 6.0 AMC server, refer to the procedure described in the tool « [Mise à jour et migration](#) » (English version is not implemented yet) on the Customer Area <http://client.arkoon.net/>.

## 3. COMPATIBLE PLATFORMS

### 3.1 APPLIANCES FAST360

Family	Compatible appliances
<b>Performance series</b>	P-XS3, P-S4, P1206, P1808, P2508, P3008, P-80XL, P-150XL, P-250XL

### 3.2 FAST360 VIRTUAL EDITION

Family	Compatible configurations
<b>Virtual Edition</b>	VMware ESX™ or VMware ESXi™ servers version 4.0 or version 4.1 VMware vSphere Client version 4.0 or version 4.1

### 3.3 AMC

Family	Compatible configurations
<b>AMC</b>	Red Hat Enterprise Linux 5 32/64 bits Red Hat Enterprise Linux 6 32/64 bits CentOS 5 32/64 bits CentOS 6 32/64 bits

### 3.4 ARKOON TOOLS

Family	Compatible configurations
<b>Administration Tools Fast360</b>	Windows XP Windows Vista Windows 7 Windows 10, with Java SUN 1.8 Virtual Machine Linux: Debian Lenny, Red Hat 5 and Ubuntu, with Java SUN 1.6 virtual machine

## 4. DOCUMENTATION

Fast360 documentation is available on the [Customer Area](#).

### 4.1 ENGLISH

Fast360 document	Name
<b>First-Time Configuration Guide</b>	First_Time_Configuration_Guide_6_0_EN.pdf
<b>Administration Guide</b>	Administration_Guide_6_0_EN.pdf
